We need it to drink, wash our bodies and clothes, cook our food and grow crops, vegetables and fruits. Water is also essential for animals, birds, insects, etc. We need huge resources of it to produce electricity on a large and commercial scale. Nearly 70 percent of our body is water. No living being can <b>exist</b> for long without water, the most valuable liquid. We use oceans, seas, rivers and lakes as waterways to carry goods, passengers, etc. Lack of water causes a lot of problems for us, so saving it is necessary. For example, using a dishwasher saves much more water than hand washing. In short, water is very important to our life and our planet.</p> <p>❖ True / False</p> <p>۴ 47. In the past, energy was produced from fossil fuels such as oil, coal, and natural gas. Although such fuels have been main resources for years, they are harmful to the environment. They have caused serious problems including air or water pollution, global warming and health problems. Also, they take millions of years to form, so they are nonrenewable- cannot be replaced easily.</p> <p>To reduce bad effects of nonrenewable energy, scientists are trying to replace <b>it</b> with other energy resources which are friendly to the environment. Such energy sources are called clean energy as they reduce the environmental risks and don't cause serious problems for humans. They are made from resources that can be replaced like wind, water, sunshine, tides and plants. As a vast country that is rich in sun radiation during most time of the year, Iran can generate enough energy by setting solar panels in desert areas like Yazd, south of Semnan or Kashan. In short, it seems that replacing fossil fuels with solar energy is the main solution to the various problems caused by burning fossil fuels.</p> <p>❖ True /false</p> <p>53. ### متن شماره ۲ :

Sara has been in the Children's Medical Center for a week. She has caught a terrible flu. The doctor told her to stay there to get better. There is a photograph of an old man on the wall. While the nurse is taking her temperature, they start talking.

- Sara:** Excuse me, who is that man in the picture?  
**Nurse:** Oh, don't you know him? Have you ever heard of Dr. Mohammad Gharib?  
**Sara:** I guess I have only seen his name in my English book, but I'm not sure about it.  
**Nurse:** Dr. Gharib was a famous physician.  
**Sara:** Oh,... can you tell me a little about his life?  
**Nurse:** Dr. Gharib was born in Tehran in 1288. After receiving his diploma, he went abroad to study medicine. In 1316 he became a physician and then came back to his homeland. In 1347 this center was founded by Dr. Gharib and one of his close friends.  
**Sara:** Really? I didn't know that.  
**Nurse:** Dr. Gharib was also a generous man. He spared no pains to cure sick children. He was very friendly and helpful to poor families. Not surprisingly, he was regarded as a dedicated physician.

### متن شماره ۳ :

To make learning new vocabulary fun and effective, you can use everyday objects around your house. Take small pieces of paper and write down new words on them, stick these notes to things like your refrigerator, desk or window. Whenever you see these words in your home, try to remember their meanings and use them in sentences or conversations. Only remove the notes when you have learned the words well. Using cards known as flashcards can be a fun and interesting way to learn new words. Write a new words one side of the flashcard and its meaning on the other. Take a few minutes each day, to review your flashcards and test yourself.
