He always (33).....(decide) to do things at the last moment, doesn't he?</p> <p>Babak: You are right! But if he told us sooner we (34)(choose) a better gift to buy.</p> <p>Ali: Exactly!</p> 	۹
۴	<p>Reading</p> <p>متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>There are many languages in the world, some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss.</p> <p>A native speaker of French, for example, will find English easier to learn than Chinese, because English is very similar to French, while Chinese is very different. As a result, first Language can affect learning a second language. The greater the differences between the second language and the first, the harder it will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system. Besides, the pronunciation of Chinese does appear to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet.</p> <p>Teachers and the conditions in which the language is learned also play an important role, as well as each learner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people who study a language that has no direct use in their day to day life.</p> <p>Read the questions and choose the best choice.</p> <p>35. The word "it" in paragraph 2 line 4 refers to.....</p> <p>a) learning first language b) second language c) difference of languages d) Chinese language</p>	۱۰

	<p>36. Hardness of learning a language can depend on.....</p> <p>a) how different it is from one's mother tongue b) whether it is French or English c) whether you are learning Japanese or Chinese d) how long it takes to master pronunciation</p> <p>True / False</p> <p>37. Being familiar with writing system of the second language makes it harder to learn. a) True b) False</p> <p>38. The reason behind learning a language can slow down or speed up learning. a) True b) False</p> <p>Answer the following questions.</p> <p>39. Which language is easier for French people to learn, English or Chinese? Why?</p> <p>40. Why does a Japanese speaker find the Chinese writing system less difficult?</p>	
۴	<p>متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.</p> <p>Experimental works are in progress to produce energy from other resources. Scientists and experts spared no pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.</p> <p>Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.</p> <p>Clean energy resources are vastly respected, valued, and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.</p> <p>Read the questions and choose the best choice.</p> <p>41. Which is the best title for this passage?</p> <p>a) The use of waste products for energy b) The search for new sources of energy c) Effective ways of producing hydropower d) New discoveries in geothermal power</p>	۱۱
